

Handout 3.1A: Directions for a Sticky Board

Materials:

- 1 plastic rectangular tablecloth.
- 1/3 can **temporary** adhesive spray.
- 1 roll painter's tape.

Directions:

- Cut tablecloth in half to form two squares.
- Lay the square tablecloth on a flat surface or tape to a wall.
- Spray lightly and allow to dry for 1 minute.
- Spray two more times, allowing to dry between applications.
- Adhere to wall with painter's tape when in use.
- Fold to store, sticky sides together (can be used repeatedly).

These directions make two reusable boards. You can make smaller sticky boards for individual students or larger ones for activities such as word walls. These are easy to use in areas where boards may not be available (e.g., libraries, on windows).

Suggested Uses:

- Word sorts.
- Brainstorming.
- Graphic organizers.
- Tier 1, Tier 2, and Tier 3 vocabulary words.
- Unit vocabulary words.
- Display of student work.
- Webbing diagrams.
- K-W-L charts (easily modified as more is learned).
- Modeling of activities.
- Assigning small group flexible membership.
