

3.2B Curriculum Maps

Big Ideas in Beginning Reading The University of Oregon

Curriculum Maps K-3

<http://reading.uoregon.edu/resources/maps.php>

The University of Oregon, Center on Teaching and Learning, maintains a website with information about beginning reading instruction.

One of the resources they have developed is a curriculum map for each grade, K-3, which outlines the crucial skills students need to learn in each of the five essential components of reading. The maps provide a systematic sequence in which students should master the skills and suggestions as to which month in the school year the skills could be taught.

PDF versions are available for each grade at:

Kindergarten
