

## Multiple Choice Questions

What is the primary purpose of including a new domain for HLPs to Intensify and Intervene as Needed?

- A. To replace existing HLPs.
- B. To address the needs of students who do not make adequate progress with core instruction and supplemental intervention.
- C. To simplify the framework for general educators.
- D. To reduce the need for collaboration among educators.

Answer: B

Which of the following HLPs is categorized as a Pillar Practice in the updated HLP framework?

- A. HLP 10: Conduct Functional Behavioral Assessments
- B. HLP 15: Use Student Assessments for Planning
- C. HLP 20: Provide Intensive Instruction for Academics and Behavior
- D. HLP 8: Establish a Consistent, Organized, and Respectful Learning Environment

Answer: C

Why are the HLPs within the intensify and intervene domain more likely to be implemented by special educators or specialists?

- A. Because they require general education teachers to attend extra training sessions.
- B. Because they involve advanced skills and knowledge typically not included in general education preparation.
- C. Because they are less important than other HLPs.
- D. Because they are designed to be used only in special education settings.

Answer: B

What is the primary goal of conducting a functional behavioral assessment (FBA)?

- A. To identify a student's academic strengths.
- B. To determine the function of a student's problem behavior.
- C. To evaluate a student's cognitive abilities.
- D. To assess a student's physical health.

Answer: B

Which of the following is NOT a key feature of the FBA process defined by the U.S. Department of Education?

- A. Develop a clear description of the behavior.
- B. Collect indirect and direct data on the behavior.
- C. Develop a hypothesis of the function of the behavior.

D. Prescribe medication to manage the behavior.

Answer: D

What type of strategies are included in a behavior intervention plan (BIP) to address problem behaviors?

A. Medical strategies

B. Financial strategies

C. Teaching and reinforcement strategies

D. Technological strategies

Answer: C

Which of the following is an example of an antecedent or prevention strategy in a BIP?

A. Providing choices

B. Ignoring the problem behavior

C. Punishing the student

D. Withdrawing privileges

Answer: A

Why is it important to consider cultural factors in the FBA process?

A. To simplify the process

B. To ensure the assessment is respectful and relevant to the student's background

C. To exclude certain behaviors from assessment

D. To expedite the creation of a BIP

Answer: B

In the FBA process, what is the purpose of collecting AntecedentBehaviorConsequence (ABC) data?

A. To identify the student's favorite activities

B. To understand the conditions that trigger and maintain the problem behavior

C. To measure the student's academic performance

D. To evaluate the effectiveness of medication

Answer: B

Which of the following statements about behavior intervention plans (BIPs) is TRUE?

A. BIPs are only for students without disabilities.

B. BIPs should not be shared with the student's family.

C. BIPs include strategies for teaching replacement behaviors.

D. BIPs are developed without any data collection.

Answer: C

## True/False Questions

True or False: Conducting an FBA involves identifying the triggers and consequences of problem behavior.

True

True or False: A behavior intervention plan (BIP) should include culturally inclusive strategies.

True

True or False: Once a BIP is created, it does not need to be reviewed or adjusted.

False

True or False: The HLPs in the intensify and intervene domain are designed to support Tier 3 intervention for students with the most intensive needs.

True

True or False: The updated HLP framework includes culturally inclusive pedagogies and practices to address intersectional needs such as language and race/ethnicity.

True
