

Chapter 5: Introduction and Pillar Practice for Data Driven Planning

Multiple Choice Questions:

1. The Pillar Practice for Data-Driven Planning is:

- a. Collaboration with families
- *b. Use student assessment data and make necessary adjustments
- c. Interpret assessment information
- d. Use multiple sources of information

2. When implementing data-driven practices, educators should:

- a. Only use standardized assessments
- b. Rely solely on observations
- *c. Use both planned and spontaneous data collection
- d. Wait until the end of the year

3. The Cycle of Data-Driven Planning includes how many main steps?

- a. Three
- *b. Five
- c. Seven
- d. Four

4. What resource did Ms. Potts recommend to Mr. Stark?

- *a. IRIS Center modules
- b. State testing guidelines
- c. District curriculum
- d. Teacher handbook

5. In the secondary example, what was Nick's assignment completion goal?

- a. 50%
- b. 60%
- *c. 70%
- d. 80%

6. According to the text, effective educators use data to:

- a. Only grade students
- b. Compare students to peers
- *c. Make meaningful instructional changes
- d. Satisfy administrative requirements

7. How often should educators review student progress data?

- a. Annually

- b. Each semester
- *c. Ongoing/continuously
- d. Monthly

8. What is a key component of the data-driven planning cycle?

- a. Annual testing
- *b. Interpreting and communicating data
- c. Quarterly reports
- d. Parent conferences

9. Which HLP is identified as core to implementing Pillar Practices 1 and 3?

- *a. HLP 2
- b. HLP 4
- c. HLP 6
- d. HLP 8

10. What type of instruction does IDEA mandate?

- a. Standardized instruction
- b. General education only
- *c. Specially designed instruction
- d. Group instruction

True/False Questions:

11. The effectiveness of data-driven planning depends solely on collecting data.

- True
- *False

12. Educators should consider cultural factors when administering assessments.

- *True
- False

13. Student input should be included in the data analysis process.

- *True
- False

14. Data collection should only occur during formal assessment periods.

- True
- *False

15. Family consent is required before conducting formal assessments.

- *True
- False

16. All assessments are equally effective for all students.

True

*False

17. Teachers should regularly reflect on their instructional practices using data.

*True

False

18. The Data-Driven Planning domain operates in isolation from other HLP domains.

True

*False

19. Formative assessment data can be used to make immediate instructional adjustments.

*True

False

20. Effective educators should use multiple sources of data to understand student needs.

*True

False
